This Singapore Standard was approved by the Management Systems Standards Committee on behalf of the Singapore Standards Council on 17 August 2017.

First published, 2017

The Management Systems Standards Committee, appointed by the Standards Council, consists of the following members:

		Name	Capacity
Chairman	:	Mr Daniel Steele	Individual Capacity
Secretary	:	Mr Steven Phua	SPRING Singapore
Members	:	Mr Go Heng Huat	Ministry of Manpower
		Ms Margaret Heng Chee Bee	Singapore Hotel Association
		Mr Koh Yeong Kheng	Association of Small and Medium Enterprises
		Mr Kumar Selvakumar	Singapore Quality Award Management Committee
		Prof Lee Pui Mun	SIM University
		Ms Annie Lin	Singapore Workforce Development Agency
		Mr Ong Liong Chuan	Individual Capacity
		Mr Seah Seng Choon	Consumers Association of Singapore
		Mr Harnek Singh	Individual Capacity
		Mr Birch Sio	Singapore Manufacturing Federation
		Ms Lynn Tan	Singapore Retailers Association
		Mr Ronald Tan	Singapore Productivity Association

The Working Group on Conformity Assessment (CASCO), appointed by the Management Systems Standards Committee to assist in the preparation of this standard, comprises the following experts who contribute in their *individual capacity*:

#### Name

**Co-Convenors** : Dr Lee Tong Kooi

Mr Ngiam Tong Yuen

Secretary : Ms Aruna Charukesi Palaninathan

**Members** : Mr Heng Hoon Jee

Dr Ho Teck Tuak
Dr Danny Ker
Ms Lee Ham Eng
Mr Kenneth Liang
Ms Jaime Lim Yin Yin
Mr Stanley Ong
Mr See Boon Ping
Mr Sze Thiam Siong

Mr Than Soe Ms Delfin Yeo

Mr Yusoof Aynuddin

The organisations in which the experts of the Working Group are involved are:

Building and Construction Authority
Health Sciences Authority
Intertek Testing Services (S) Pte Ltd
Ministry of Manpower
Monsunque Pte Ltd
Setsco Services Pte Ltd
Singapore Quality Institute
Singapore Welding Society
Society of Loss Prevention
SPRING Singapore
The Institution of Engineers, Singapore

TÜV Rheinland Singapore Pte Ltd

TÜV SÜD PSB Pte Ltd

#### **National Foreword**

This Singapore Standard was prepared by the Working Group on Conformity Assessment (CASCO) under the direction of the Management Systems Standards Committee.

This standard is identical with ISO/IEC 17030:2003 published by the International Organization for Standardization.

Where appropriate, the words "International Standard" shall be read as "Singapore Standard". The reference "ISO/IEC 17000" shall be replaced by "SS ISO/IEC 17000":

Attention is drawn to the possibility that some of the elements of this Singapore Standard may be the subject of patent rights. Enterprise Singapore shall not be held responsible for identifying any or all of such patent rights.

#### **NOTE**

- Singapore Standards (SSs) and Technical References (TRs) are reviewed periodically to keep abreast of technical changes, technological developments and industry practices. The changes are documented through the issue of either amendments or revisions.
- 2. An SS or TR is voluntary in nature except when it is made mandatory by a regulatory authority. It can also be cited in contracts making its application a business necessity. Users are advised to assess and determine whether the SS or TR is suitable for their intended use or purpose. If required, they should refer to the relevant professionals or experts for advice on the use of the document. Enterprise Singapore shall not be liable for any damages whether directly or indirectly suffered by anyone or any organisation as a result of the use of any SS or TR.
- Compliance with a SS or TR does not exempt users from any legal obligations.

#### **Foreword**

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of conformity assessment, the ISO Committee on conformity assessment (CASCO) is responsible for the development of International Standards and Guides.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

Draft International Standards are circulated to the national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 17030 was prepared by the ISO Committee on conformity assessment (CASCO).

It was circulated for voting to the national bodies of both ISO and IEC, and was approved by both organizations.

#### Introduction

Marks of conformity take many forms and different uses. They can convey useful information about a product, or indicate particular characteristics of a product such as its safety, quality, performance, reliability or impact on the environment. They are found on products, certificates and publications denoting the conformity to specified requirements of a product, management system, service, process, person or an organization. Most important for all marks of conformity is to gain the confidence of the market, including consumers, in products and other objects of conformity assessment to which these marks have been applied.

The prime purpose of this International Standard is to enable a uniform approach to the use of third-party marks of conformity, to fill relevant gaps in existing ISO, IEC, ISO/IEC Standards and Guides, to address potential problems arising from different uses of third-party marks of conformity, to provide a clear and rational basis for their use, and to set out general requirements. This International Standard concentrates on third-party marks of conformity but may also be used as guidance for other applications of marks of conformity.

This International Standard is based on market feedback and demands from various users and issuers of marks of conformity assessment. It takes account of the ISO report on *Marks of conformity assessment*, published in May 1999. The use of this International Standard should lead to improved market confidence, international recognition and consumer acceptance of third-party marks of conformity.

# Conformity assessment — General requirements for thirdparty marks of conformity

#### 1 Scope

This International Standard provides general requirements for third-party marks of conformity, including their issue and use.

NOTE This International Standard can also be used as guidance in using marks of conformity in other than third-party conformity assessment activity.
